ABOUT ME

Full Stack Developer experienced in building scalable web applications and business management platforms. Skilled in modern technologies including Next.js, React.js, TypeScript, Node.js, MongoDB, and PostgreSQL. Experienced in developing enterprise-style dashboards, role-based access systems, and data-driven analytics platforms with a focus on modular architecture, performance optimization, and responsive UI development.

EDUCATION

IBSAR, NAVI MUMBAI
BCA

2023-2026

SKILL

Technical Skills

Languages

- JavaScript, TypeScript

Frontend

- React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend

- Node.js, Express.js, REST API Development

Databases

- MongoDB, PostgreSQL

State & Data Management

- Zustand, TanStack React Query

Libraries & Tools

- React Hook Form, Zod, Recharts, Framer Motion, Shadcn UI, Axios, DnD Kit, Socket.io-client

Concepts

- Authentication (JWT), Role-Based Access Control (RBAC), CRUD Operations, API Integration, Dashboard Architecture

Professional Skills

- Problem Solving & Debugging
- Client Communication & Requirement Analysis
- Agile Development Practices
- Quick Learning & Adaptability

Tools & Technologies

- Git & GitHub (Version Control, Collaboration)
- Postman (API Testing & Debugging)
- VS Code

PROJECTS

ENTERPRISE RESOURCE PLANNING (ERP) SYSTEM — NEXT.JS, TYPESCRIPT, POSTGRESQL (UNDER DEVELOPMENT)

Developing a specialized ERP platform designed to manage financial transactions, project operations, and administrative data through a modern dashboard interface.

Key Contributions

- Developed an ERP admin dashboard using Next.js and TypeScript.
- Implemented financial transaction management supporting voucher types such as receipt, payment, contra, journal, sales, and purchase.
- Built ledger management modules categorized by asset, liability, income, and expense.
- Designed multi-site and project management modules supporting operations like parking and dispatch management.
- Implemented Role-Based Access Control (RBAC) with granular user permissions.
- Built validated forms using React Hook Form and Zod.
- Managed global state using Zustand.
- Developed financial analytics dashboards using Recharts.

WEB AGENCY HRM SYSTEM — NEXT.JS, REACT, TYPESCRIPT

Developed a Human Resource Management platform for managing employees, internal projects, and workforce operations.

Key Contributions

- Built a responsive HR dashboard using Next.js App Router.
- Implemented RBAC supporting ADMIN, HR_MANAGER, MANAGER, EMPLOYEE, and CLERK roles.
- Developed employee profile management storing personal, financial, and professional information.
- Implemented project lifecycle tracking including planning, in-progress, on-hold, completed, and cancelled states.
- Built drag-and-drop Kanban task management using DnD Kit.
- Implemented real-time chat and notifications using Socket.io.
- Developed analytics dashboards using Recharts.

Customer Relationship Management (CRM) Platform — Next.js, TypeScript

Developed a CRM system for managing customer relationships, sales pipelines, and business analytics.

Key Contributions

- Built a CRM dashboard for managing leads, customers, and deal pipelines.
- Implemented lead lifecycle tracking and customer categorization.
- Developed sales pipeline stages including in-talks, stage-1, won, and lost.
- Created task and activity tracking modules for meetings, calls, and notes.
- Implemented server state management using TanStack React Query.
- Built validated forms using React Hook Form and Zod.
- Developed sales analytics dashboards using Recharts.

Company Website — Next.js, Tailwind, Typescript

- Developed a responsive business website using Next.js with modern UI/UX principles.
- Implemented Server-Side Rendering (SSR) to improve SEO and performance.
- Built reusable UI components to support scalable frontend architecture.

Client Websites (Freelance Projects)

- Delivered 3+ responsive client websites with optimized performance and modern UI.
- Implemented dynamic UI components and API integrations.
- Customized functionality based on client requirements.

WORK EXPERIENCE

Freelance Web Developer — WebMatrix

Nov 2025 – Now

- Developed and deployed web applications including HRM and CRM systems.
- Built scalable full-stack solutions using the MERN stack.
- Implemented authentication systems and REST APIs.
- Delivered projects on time while adapting to changing client requirements.

Frontend Developer Intern — Minimalistic Technology

Sept 2025 – Jan 2026

- Developed 2 responsive website templates using React.js and Next.js.
- Built reusable UI components with modern UI/UX and mobile-first design.
- Implemented dynamic routing and server-side rendering (SSR).
- Contributed to a live client project focusing on frontend development and UI improvements.
- Debugged UI issues and optimized frontend performance.
